SUMMARY

Senior software engineer with experience designing and delivering scalable systems in complex business domains. Strong focus on clean architecture, domain-driven design, and writing code that holds up over time. Comfortable leading engineering teams without losing touch with the technical work - from architecture decisions down to code reviews. Built a track record of growing within a single organisation by taking on harder problems at each stage.

PROFESSIONAL EXPERIENCE

Senior Lead Software Engineer · M&C

Jan 2024 - Present

- Manage and coordinate backend and frontend engineering teams, guiding team leads on delivery standards and collaboration.
- Work with DevOps, Architecture, and Product to align roadmap efforts and review technical and change requests.
- Led the design and delivery of payment reconciliation and accounting solutions end-to-end.
- Applied Clean Architecture and Clean Code principles across the codebase to keep it maintainable over time.
- Handled mentorship, agile facilitation, design patterns adoption, and cross-team technical coordination.

Software Engineer - Adad (Payment Reconciliation Platform) · M&C

Apr 2022 - Dec 2023

- Built a payment reconciliation platform using Domain-Driven Design and Hexagonal Architecture.
- Set up an Event-Driven Architecture to handle transaction flows reliably and at scale.
- Developed REST APIs and ETL pipelines processing airline sales and payments data and generating the corresponding accounting outputs.
- Delivered KPI dashboards and data visualisation tools used by business and finance teams.

Software Engineer - Amadeus Revenue Accounting · M&C

Oct 2018 - Mar 2022

- Handled support, operations, maintenance, and recovery within the Amadeus ecosystem.
- Built automation tools to streamline recurring processes and cut down on manual effort.
- Resolved production incidents and built solid expertise in airline accounting and interline operations.

Software Engineering Intern · M&C

Mar 2018 - Jul 2018

- Built a driver activity monitoring system for HouseCab VTC, covering data collection, analysis, and visualisation.
- Connected WEBFLEET and Google Maps APIs to feed real-time location and activity data into the dashboards.

SKILLS

Backend: Node.js, Nest.js, Java, Spring Boot, Spring Reactive, REST APIs, Express.js

Frontend: Angular, Nx Angular, TypeScript, Google Material Design, ChartJS, Data Visualization

Architecture: Clean Architecture, Domain-Driven Design, Hexagonal Architecture, Event-Driven Architecture, TDD, Design Patterns

DevOps & Tools: Docker, AWS, Linux, Shell Scripting, Git, CI/CD, Jira, Scrum

Data & Databases: SQL, MongoDB, NoSQL, ETL, Analytics, KPI Dashboards, Python, Pandas

Domain Expertise: Revenue Accounting, Payment Reconciliation, Interline Operations, Amadeus

EDUCATION

Engineering Degree - Computer Science

2017 - 2018

Grenoble INP - Ensimag, France

International exchange programme · Software Engineering specialisation

Engineering Degree - Computer Science

2015 - 2017

ENSIT - Tunis, Tunisia

Software Engineering specialisation · Algorithms and Systems

Engineering Preparatory Classes

2013 - 2015

IPEIT - Tunis, Tunisia

Mathematics and Physics
