

Sofiene Jouini

Senior Software Engineer

jouinisofiene@gmail.com | +216 96 842 492 | Tunis, Tunisia | [LinkedIn](#) | [GitHub](#)

SUMMARY

Senior software engineer specialising in scalable backend systems, clean architecture, and domain-driven design. Seven years with the same organisation, progressively taking on more complex engineering and leadership responsibilities across payment reconciliation and airline accounting platforms. Led backend and frontend teams while staying close to architecture decisions and code quality.

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Team Lead) · M&C

Jan 2024 - Present

- Took on technical leadership of the same product, leading and synchronizing backend and frontend teams to design and deliver clean, well-architected solutions around payment reconciliation and accounting in the airline industry.
- Along the way, built solid functional expertise in payment reconciliation and airline finance, which helped a lot in translating business needs into the right technical decisions.
- Provided guidance and mentorship across the team, and made sure clean architecture, clean code, and design patterns were applied consistently.
- Coordinated with DevOps during releases, collaborated with the Architecture team on design decisions and technical evolution, and worked with the Product team on roadmap alignment.

Software Engineer - Adad (Payment Reconciliation Platform) · M&C

Apr 2022 - Dec 2023

- ADAD is an agnostic end-to-end payment reconciliation platform for the airline industry, connecting with airlines' payment and finance ecosystems to automate the validation and reconciliation of transactions across multiple payment providers, bank accounts, and platforms. A SaaS product that brings real structure to a traditionally complex and manual process, currently live in production with several international carriers and being rolled out to more.
- Involved in the full product lifecycle, from inception to delivery. Worked in an Agile environment using Scrum and Jira, designing and building ETL pipelines, REST APIs, and services around a Hexagonal, Event-Driven SOA architecture with ActiveMQ as the messaging broker.
- Implemented using TypeScript, NestJS, Java, Spring Reactive, and Angular, backed by PostgreSQL and MongoDB with Redis for caching, deployed on AWS. Practiced DDD, TDD, and Reactive Programming throughout, with a constant focus on clean, maintainable, and reliable code.
- Also contributed to data analytics, KPI dashboards, and data visualization, bringing visibility into reconciliation outcomes and financial reporting.

Software Engineer - Amadeus Revenue Accounting · M&C

Oct 2018 - Mar 2022

- Amadeus Revenue Accounting is a platform that manages airline passenger revenue accounting from real-time sales and usage recording to ticket auditing, interline billing, and financial settlement between airlines.
- Worked on support, operations, maintenance, and recovery tasks in this environment, picking up solid knowledge of airline IT, airline accounting, and interline operations, and built tools to automate some of the manual processes along the way.

Software Engineering Intern · M&C

Mar 2018 - Jul 2018

- Built a driver activity monitoring system for HouseCab VTC, covering data collection, analysis, and visualisation.
- Connected WEBFLEET and Google Maps APIs to feed real-time location and activity data into the dashboards.

SKILLS

Backend: Node.js, Nest.js, Java, Spring Boot, Spring Reactive, REST APIs, Express.js

Frontend: Angular, Nx Angular, TypeScript, Google Material Design, ChartJS, Data Visualization

Architecture: Clean Architecture, Domain-Driven Design, Hexagonal Architecture, Event-Driven Architecture, TDD, Design Patterns

DevOps & Tools: Docker, AWS, Linux, Shell Scripting, Git, CI/CD, Jira, Scrum

Data & Databases: SQL, MongoDB, NoSQL, ETL, Analytics, KPI Dashboards, Python, Pandas

Domain Expertise: Revenue Accounting, Payment Reconciliation, Interline Operations, Amadeus

EDUCATION

Engineering Degree - Computer Science

2017 - 2018

Grenoble INP - Ensimag, France

International exchange programme · Software Engineering specialisation

Engineering Degree - Computer Science

2015 - 2017

ENSIT - Tunis, Tunisia

Software Engineering specialisation · Algorithms and Systems

Engineering Preparatory Classes

2013 - 2015

IPEIT - Tunis, Tunisia

Mathematics and Physics
